## ECO 1200C Core Cutter

Flexor Poland Sp. z o.o.  
ul. Strażacka 4  
95-080 Tuszyn  
Poland  
info@flexor-group.com

## Highlights

- Circular knife
- Adapters for different core diameters
- Semi-automatic operation mode
- Rotary stopper with measuring scale
- Robust construction & easy to operate

## Technical data

ECO Core Cutter	1200L
Max. core length (mm)	1000
Max. core thickness (mm)	7
Min. cut core width (mm)	20
Core adapter diameters	25.4   40   70   76.2

## About Core Cutter

The ECO 1200C is an easy-to-handle, solid, semi-automatic peripheral device designed for precise and fast on-site cutting of label cores.

The desired length is set by using a rotary stopper with a clear measuring scale. After the core is slid onto the mandrel, the motor engages automatically when the lever with the circular knife is lowered. For different core diameters, the device can be quickly adjusted by changing the adapters.
